Abstract (en)

[origin: WO2013179326A1] The present invention relates to a concealed hinge for furniture doors and doors and windows comprising two fixed bodies which will be mounted on the jamb and on the openable door, two arms connecting the two bodies, where each of the two arms has one end pivoted to one of the two bodies and the opposite end is engaged in a guide path of the other body, of which at least one of said guide paths is not straight.
