Abstract (en)

[origin: WO2014093339A1] Systems, methods, and apparatus for implementing at least one virtual agent. In some embodiments, the at least one virtual agent is programmed to analyze first information regarding a first person; analyze second information regarding a second person different from the first person; and make a joint recommendation for a plurality of persons based at least in part on the first and second information, wherein the plurality of persons comprises the first person and the second person.
