Abstract (en)
[origin: WO2014064372A1] The invention relates to a support (1) for a drum (10) comprising a built-in seat (6) having a sitting surface, especially for a Guianese, West Indian, African and any other type of drum played sitting down, comprising: a substantially flat horizontal support element (4); a substantially flat vertical support element (3) arranged on the horizontal support element (4), said vertical support element (3) supporting the sitting surface of the built-in seat (6); and a means (5) for holding said drum (10), arranged on at least one of the surfaces of the vertical support element (3); characterised in that said holding means (5) is in the form of an essentially flat profiled part (5) bent at the two ends (5a, 5b) thereof, one of said two ends (5b) being able to cooperate with the inner surface (11) of the drum (10) in order to hold said drum (10) on the support (1) comprising the built-in seat (6), and characterised in that the other one of said ends (5a) is attached to said vertical support element (3).
