Abstract (en)  
[origin: CA2885367A1] The present invention relates to a contact element for electrically conductive connection of components, the contact element having contact points for contacting contact regions of the components and having a first section, formed at least partly in the shape of a spring tab, that electrically connects the contact points, and having a second section that electrically connects the contact points, wherein the connecting path formed by the second section is shorter than that of the first section.
