Abstract (en)
A multiaxial sealing strip, for joining at least a first element (11), a second element (9, 12) and a third element (10, 13) in a sealed manner, wherein it comprises a first sheet (1) and a second sheet (2), which are flexible and waterproof, being joined to each other in a first area (3) from where they separate, thus defining each flexible branch (4), the inner surfaces of which are covered, at least partially, by an adhesive sheet (5), upon which a removable protective film (6) is comprised, in order to stick each one of the adhesive sheets (5) onto one of the two contiguous faces of the first element (11) along its entire perimeter and onto which the second element (9, 12) and the third element (10, 13) are respectively fastened, and where the first area (3) is arranged between the second element (9, 12) and the third element (10, 13) that are joined to each other, the strip thus being completely hidden. The first sheet (1) and the second sheet (2) comprise a waterproof layer (7), which comprises a reinforcing mesh (8) on the rear surface thereof.
