Abstract (en)
A dishwasher includes a housing case, a washing tub disposed in the housing case, and a dish basket disposed in the washing tub for receiving dishes. The dish basket has setting sections (29) that are divided according to kinds of the dishes. The setting sections (29) include support portions (32) for supporting the dishes from underside, and ring-shaped ribs (35) serving as guide-shaped portions that imitate a sectional shape or an outline of the dishes. A support plane (W1) including the support portions (32) on one plane, and a guide-shaped plane (W2) including the guide-shaped portions on another plane are disposed at different positions. This configuration facilitates recognition of kinds and orientations of dishes to be placed, and accommodates dishes of different kinds in one area, hence providing the dishwasher of excellent usability.
