Abstract (en)
A display poster edging strip (10) is provided which comprises a longitudinal flange (14) adapted to be located in a longitudinal track, and a web (16) extending from the flange (14). The flange (14) has a thickness greater than the thickness of the web (16) and comprises natural fibrous materials. The web (16) comprises paper or card of natural fibrous materials and includes adhesive means adapted to secure the web (16) to an edge of a paper display poster (40). The use of natural fibrous materials allows for recycling of the materials, and when the edging strip (10) is used with a paper display poster the edging strip and poster can be recycled together, since they contain minimal plastic or other non-natural materials.
