Abstract (en)  
[origin: WO2014068557A1] The invention relates to a large scale process for the in vitro production of a cell line callus culture of grape berry cells grown, to a product made according to this process and to a composition comprising a complex of polyphenols including resveratrol, wherein the ratio of the resveratrol to the polyphenols is higher than the ratio of resveratrol to polyphenols in grapes grown naturally.
