Abstract (en)

[origin: WO2014067803A1] The invention discloses a method for determining an input position on a touch-sensitive display by a user, comprising: detecting the position of the user's eyes, in particular with the aid of a camera; detecting the position of touch on the touch-sensitive display; determining the input position on the basis of the detected position of the eyes with respect to at least one part of the touch-sensitive display, in particular with respect to a graphical element displayed on the display, and the detected touch position.
