Abstract (en)

[origin: US2015361624A1] The invention relates to a mat (10) suitable for being rolled up and having a longitudinal direction (L) and a transverse direction (T), the mat having at least first and second pockets (20; 20') extending in the transverse direction of the mat, each of the first and second pockets being defined between at least a first portion (22, 22') and a second portion (28, 28') fastened to the first portion. The invention is characterized by the fact that the first portion of each pocket presents a free lateral end edge (26, 24') placed facing the other pocket and extending in the transverse direction of the mat, the free lateral end edge (26) of the first portion (22) of the first pocket (20) being spaced apart from and distinct from the free lateral end edge (24') of the first portion (22') of the second pocket (20').
