Abstract (en)  
[origin: CN104895400A] The invention relates to a fixing device for fixing a rigid fence on a post. The fixing device connects at least one rigid fence (10) to a post (11) which includes one longitudinal slot (111), and is vertically fixed on a bearing surface (12) basically, and includes one first fixing piece (30), wherein the first fixing piece (30) includes a first support member which is coordinated with the longitudinal slot (111) for fixing the first fixing piece (30) on the post (11), a second support member for supporting the rigid fence (10), and at least one stop dog part (303) for preventing translation of the first fixing piece (30) along the longitudinal axis direction of the longitudinal slot (111).

Abstract (fr)  
Un dispositif de solidarisation d'au moins un panneau de grillage rigide (10) comprenant des fils à un poteau comprenant une rainure longitudinale de solidarisation (111) et destiné à être solidarisé essentiellement verticalement à un support (12), ledit dispositif comprenant un premier élément de solidarisation (30), ledit premier élément de solidarisation (30) comprenant au moins : - des premiers moyens de maintien prévus pour coopérer avec ladite rainure (111) pour maintenir ledit premier élément de solidarisation (30) solidaire dudit poteau (10) ; - des deuxièmes moyens de maintien pour maintenir ledit panneau de grillage rigide (10), et - au moins un élément formant une butée d'arrêt (303) selon l'axe longitudinal de ladite rainure (111) pour bloquer en translation ledit premier élément de solidarisation (30) le long de ladite rainure (111).
