Abstract (en)  
[origin: CN104895400A] The invention relates to a fixing device for fixing a rigid fence on a post. The fixing device connects at least one rigid fence (10) to a post (11) which includes one longitudinal slot (111), and is vertically fixed on a bearing surface (12) basically, and includes one first fixing piece (30), wherein the first fixing piece (30) includes a first support member which is coordinated with the longitudinal slot (111) for fixing the first fixing piece (30) on the post (11), a second support member for supporting the rigid fence (10), and at least one stop dog part (303) for preventing translation of the first fixing piece (30) along the longitudinal axis direction of the longitudinal slot (111).
