Abstract (en)

[origin: RU2606660C2] FIELD: weapons and ammunition.SUBSTANCE: group of inventions relates to weapons, particularly, to gun barrel retainers and of multi-barrel small fire arms barrel units with said retainer. Barrel retainer fastens at least two barrels of hand fire arms. Retainer comprises first retaining part and second retaining part. First part is fixed on first barrel, second retaining part receives second barrel. Second retaining part is made with possibility of displacement relative to first retaining part by means of parallel guiding trunnions. Adjustment device includes adjusting screw located in middle between guiding trunnions, and counter screw, coaxial with adjusting screw.EFFECT: creation of stable and undivertable attachment of barrels, at which barrel movement is possible.12 cl, 14 dwg
