Abstract (en)

[origin: WO2014072128A1] The present invention relates to a hull (1) for a boat comprising a boat drive (2) which is led through a hull opening (3) in the floor of the hull (1), the boat drive (2) being connected to the hull (1) by means of at least one fastening means (4). At least one positioning element (5) is provided on the external side (6) of the hull for positioning the fastening means (4) relative to the hull (1). Further disclosed are a boat comprising such a hull and a method for producing a boat comprising a boat drive.
