Abstract (en)

[origin: WO2014072009A1] The invention relates to a machine for filling bags for example with meat, vegetables, pet food, beef sausages or similar products of any desired shape or irregular size, and to a corresponding method for filling such bags 1. The machine comprises a filling system for feeding the product. Means for compressing the product also form a path for directing the product into the open bag. Introduction means drive the product along the path into the open bag.
