Abstract (en)

[origin: WO2014072385A1] Disclosed is a building envelope, in particular a building wall, floor, or roof, comprising at least two spaced-apart shells that enclose an intermediate space therebetween, said intermediate space being essentially empty except for weight-bearing and/or construction engineering elements or being filled in at least some sections with porous, open-cell material and being sealed from the exterior and interior of the building. A plurality of heat pipes which are connected to a heat collector on the shell facing the exterior and which end in the intermediate space is arranged in the intermediate space.
