Abstract (en)
[origin: US2014083034A1] The present invention is directed to an article of manufacture suitable for flooring utilization which comprises a flooring panel adapted for interlocking connection with another correspondingly adapted flooring panel, such article having at least one edge with one or more elements formed such that they are operative to mate with one or more reciprocal elements associated with said other correspondingly adapted flooring panel, which article further comprises a frictional backing material that is non-adhesive in respect of, but exhibits resistance to movement with respect to, a surface underlying the article when in contact with the surface; and a method of making same.
