Abstract (en)  
[origin: WO2014053361A1] The present invention relates to a hermetic compressor (1) comprising a casing (2) which supports the members therein and wherein the oil lubricating the movable members is placed, a motor (3) having a rotor and a stator, a piston (4) that sucks and pumps the refrigerant by moving with the actuation received from the motor (3), and a crankshaft (5) providing the rotational motion of the rotor to be transmitted to the piston (4) in the form of linear motion.
