Abstract (en)
Provided is a darts game apparatus whereby, without making the housing of a darts game apparatus large, it is possible to display special effects with the entire device. The darts game apparatus comprises: a main body; a holding member positioned on at least a partial region of the surface of the main body and configured to retain the leading end of a dart which has hit a target; an image degeneration unit configured to generate image data, which is displayed in at least the partial region of the surface of the main body; and a projection device configured to project the image corresponding to the generated image data in at least the partial region of the surface of the main body.
