Abstract (en)

The invention relates to an edge fitting (1) for protecting and supporting an outer edge of a cargo casing. The edge fitting (1) has a body comprising a base plate (3) with a first surface (4) facing said cargo casing in a mounted state of the edge fitting (1) and an opposite second surface facing away from the cargo casing in said mounted state. The body further comprises a border profile (6) extending perpendicularly or at least substantially perpendicularly to the base plate (3) and configured to extend along at least a part of said outer edge in said mounted state. A securing member (7) is arranged at said second surface projecting therefrom and configured to removably secure said body to a pallet (8) supporting said cargo casing or a lid resting on it by friction to an inner surface of an opening (10) of said pallet (8) or lid after introduced therein.
