Abstract (en)
[origin: WO2014076553A2] A method to manufacture a crystallizer (10) with plates for continuous casting of slabs comprises at least a first step of making at least one of two wide walls (11), facing each other, in order to create at least one shaped portion (20) thereof. Moreover, during this first step, the wide walls (11) are obtained in the finished form by means of a molding operation, in which the mold faithfully reproduces the shaped portion (20) that said wide wall (11) must have at least on a portion of its own internal face (16).
