Abstract (en)  
[origin: WO2014076112A1] The invention relates to a device (10) for stamping sheet-like cardboard materials, comprising a stamping plate (11; 11a) that accommodates the cardboard materials at times, wherein a preferably plate-like calibration element (16) is arranged in at least one corner region of the rectangular stamping plate (11; 11a), and wherein at least one additional calibration element is arranged in an intermediate region (18) arranged between the corner regions. According to the invention, the additional calibration element is designed as an elongated calibration rod (20; 20a; 20b; 20c), wherein the calibration rod (20; 20a; 20b; 20c) has a length/width ratio (L/W) of at least 5:1.
