Abstract (en)
[origin: WO2014075845A1] The invention relates to a granular surface cleaning composition comprising from 0.2 to 12 wt. % of polyacrylic acid based swellable polymer; from 10 to 80 wt. % of cellulose fiber; from 10 to 45 wt. % of water and wherein the average granule size is from 0.05 to 5 millimeter. Said granular composition can be used to efficiently clean surfaces, with little or no use of added water. In addition said composition can optionally be mixed with ash to improve the surface cleaning efficiency of the ash.
