Abstract (en)
[origin: WO2014076384A1] The invention concerns a modular tent system comprising a central tent module (100) that comprises: a tent canvas (104) in which at least one opening (106a, 106b) is formed, said opening being provided with a first fixing means (112a, 112b) and extending over a first surface (P1) inclined relative to a vertical plane; at least one covering (116, 118) extending around the opening (106a, 106b) and projecting from the tent canvas towards the outside of the central tent module, the covering having a peripheral edge (116c) provided with a second fixing means (120) and extending over a second surface (P2) inclined relative to the vertical plane (V1), the second surface being inclined, relative to the vertical plane, in the opposite direction to the first surface.
