Abstract (en)

[origin: GB2513331A] A brake shield 4 includes a labyrinth ventilation material 5 through which air may pass, but which resists the passage of debris. The labyrinth ventilation material may be a corrugated sheet material and may define one or more tortuous paths 10 through the material. The corrugations or louvers may extend vertically or radially. The brake shield may be used in conjunction with a disc brake or a drum brake.
