Abstract (en)
[origin: WO2014078480A1] A method of operating a device includes buffering sensor information from an environment around the device as buffered sensor information, detecting a gaze of a person in the environment, based on the gaze detected, initiating recognition of some sensor information including the buffered sensor information; the recognition determining at least one instruction in the sensor information including the buffered sensor information; and operating the device based on the at least one instruction.
