Abstract (en)

[origin: WO2014076386A1] A method for assisting remote vehicle diagnosis. The invention concerns a method for assisting the remote diagnosis of a vehicle (100), the vehicle (100) comprising a first computer (102), and at least a second computer (103) connected to the first computer (102), said method comprising: - checking (306) whether the request for a remote diagnosis session is authorised and, if the request is authorised, transmitting a message (205) from the second computer (103) to the first computer (102), the message comprising data in response to the request, - transmitting the response message (206) from the first computer (102) to the diagnostic tool (101).
