Abstract (en)

[origin: WO2014076043A1] The invention relates to a money dispensing unit (23), comprising an electric motor (25), a control device (24), which has a storage unit (32), wherein the electric motor (25) is coupled to the control device (24) by means of a controllable switch (26) and can be activated with current/voltage by means of the switch (26) in order to dispense money; and wherein the control device (24) is provided and designed to provide a code; and a comparison module (28) for receiving the code and comparing the code with a predefined code, wherein if the received code is identical to the known code, the switch (26) can be activated in order to supply voltage to the electric motor (25) in order to dispense money.
