Abstract (en)
[origin: WO2014096185A1] The invention relates to a device socket (5) for an electric outlet (1), said device socket (5) comprising connection terminals (11-13) and contact elements (8-10) which are electrically connected to one another by conductor tracks (15-17). One conductor track (15) has a separating point (18) where ends (19) and (20) of the conductor track are removably connected in an electrically conductive manner.
