Abstract (en)
A module defining a parallelepiped space (2) for a prefabricated structure comprises a plurality of panels (3) of polymeric material and plate joints (G) to connect rigidly at least two front ribs (6) of respective adjacent panels (3) and at least a pair of spacers (12) rigidly connected to respective plate joints (G) on opposite sides of the front rib (6). In particular, each spacer (12) projects with respect to the panel (3) outside the space (2) in a direction (T) perpendicular to a longitudinal median plane (M) of the panel (3).
