Abstract (en)

The watch comprises a case (3) for housing a clockwork, a control stem (S) and a crown (5) to actuate the stem (S) from the outside of the case, wherein the crown (5) is connected to the stem (S) through a securing member (27) by means of an axial constraint (35, 37) and of a torsional constraint (13T, 29M) that can be released independently of each other.
