Abstract (en)

[origin: WO2014080111A1] The knitted belt (1) according to the invention comprises regions (4-8) having a different elasticity over the circumference thereof, wherein some of the regions (5, 6) corresponding to relatively hollow regions (13, 11) of a user's waist have a maximum level of local elasticity, in particular in a central back region (6) and two lateral front regions (5) corresponding respectively to the spine and to the tendons linking the wearer's rectus abdominis with the external oblique muscles.
