Abstract (en)

[origin: WO2014079615A1] The invention relates to a method for producing a valve device (1) having a valve block (2) and at least one attachment part (3, 4) contacting a contact surface (7, 8) of the valve block (2), wherein the valve block (2) is produced by means of extrusion molding in an extrusion direction (12) and subsequent separation perpendicular to the extrusion device (12). According to the invention, the contact surface (7, 8) is formed for the attachment part (3, 4) by the separation. The invention further relates to a valve device (1).
