Abstract (en)
[origin: WO2014079664A1] The invention relates to an exhaust-gas aftertreatment device (14) for the aftertreatment of an exhaust gas of an internal combustion engine (12), comprising an SCR catalytic converter (26), which comprises an SCR catalytic coating arranged on a flow-through substrate for selectively reducing nitrogen oxides (NOx) in the presence of a reductant added to the exhaust gas in a metered manner, and an SCR particle filter (28), which is arranged downstream of the SCR catalytic converter (26) and which comprises an SCR catalytic coating arranged on a particle filter substrate for selectively reducing nitrogen oxides (NOx) in the presence of the reductant added to the exhaust gas in a metered manner. The invention further relates to a motor vehicle, comprising an internal combustion engine (12) and such an exhaust-gas aftertreatment device (14).
