Abstract (en)  
[origin: WO2014079428A1] The invention relates to a slave cylinder having a housing (1) which is arranged concentrically around a transmission input shaft and consists of a plastics main material, and having an annular piston (3) which is axially movable therein, is able to be subjected to a pressure of a pressure medium and is operatively connected to a release bearing (7), wherein a stop is provided on the housing (1), said stop limiting a stroke of the piston (3) in the direction of the release bearing (7), and the stop (a) consists according to the invention at least partially of a metal sleeve and/or of a second plastics material different from the plastics material of the main body of the housing (1) or interacts therewith.
