Abstract (en)

[origin: WO2014079627A1] The present invention relates to a joint (1), in particular for a motor vehicle, for the articulated connection of at least two components (3, 4). To provide a joint that has only a low weight, is easy to install and can be adapted more effectively to the respective requirements, it is proposed according to the invention that the joint (1) is composed of an elastic fibre composite material.
