Abstract (en)

[origin: WO2014080136A1] The invention relates to a spin-stabilised projectile (1) comprising a body (2) enclosing a payload (5) formed by a group of sub-projectiles (6) that can be dispersed over a trajectory under the action of a pyrotechnic charge (10). The projectile is characterised in that the pyrotechnic charge (10) is formed by a detonation relay that is separated from the payload (5) by a piston (11) slidably mounted in the body (2), said piston comprising a passage (16) covering the detonation relay (10).
