Abstract (en)

[origin: WO2014079626A1] The invention relates to a method for querying vehicle data, in particular data connected with the mileage and/or wear of the vehicle, comprising the following steps: a) transmission of a vehicle identifier from a terminal device (2) to a server (10); b) establishment of a wireless data connection between the server (10) and the vehicle (14) identified by the vehicle identifier; c) transmission of data from the control device (16) of the vehicle (14) to the server (10); d) analysis of the transmitted data where applicable; e) transmission of the data and/or the analysis results to the terminal device (2).
