## Abstract (en)

[origin: EP2923587A1] The invention relates to the tobacco substitutes, in particular to smoking compositions without tobacco and is intended mainly for smoking with the hookah use. In the method of preparation the smoking composition without tobacco for the hookah which comprises the preliminary preparation of the main organic material, at least one type of fruits is used as the main organic filling material and the mix of propyleneglycol and food glycerin in a proportion (1:4)-(4:1) is used as the binding, and preliminary preparation of the main organic filling material is performed by a liofilization in the process of which the fruits are crushed to fraction 3-12 mm, refrigerated in liquid nitrogen at a temperature (-) 40 - (-) 60 °C, exposed under vacuum during 30-40 minutes to the receipt of the filling material with residual dampness of 1-6%, and its soaking with binding is carried out with the following ratio of components in composition, mas. %: - the main organic filling material - 10-55; - the binding - the rest. Technical result: the method of preparation the smoking composition without tobacco for the hookah allows to reduce the burning rate and the consumption for one filling. This method improves the quality of the smoking composition.
