Abstract (en)

[origin: CN104939488A] The invention relates to an applicator (10) for a cosmetic product, particularly mascara, comprising a twisted core (12) and the fibers extending from the core (12) being maintained by said core (12), said core (12) having a main longitudinal extension direction, called the main axis (X), said core (12) being straight along said main axis (X). The fibers form an envelope (E) with their free end, said envelope (E) including surfaces (F1-F4), which alternate around the main axis (X), said faces (F1-F4) being curved, a section formed transversely to the main axis (X), said cross section having a substantially polygonal shape so as to form the edges between said curved surfaces (F1-F4). The invention also relates to a method for manufacturing an applicator (10).

Abstract (fr)

L'invention concerne un applicateur (10) pour produit cosmétique, notamment mascara, comprenant une âme torsadée (12) et des fibres qui s'étendent à partir de l'âme (12) en étant maintenues par ladite âme (12), ladite âme (12) présentant une direction d'extension longitudinale principale, dite axe principal (X), ladite âme (12) étant rectiligne le long dudit axe principal (X). Les fibres forment une enveloppe (E) avec leur extrémité libre, ladite enveloppe (E) comprenant des faces (F1-F4) qui alternent autour de l'axe principal (X), lesdites faces (F1-F4) étant courbes, une section réalisée transversalement à l'axe principal (X), dite section transversale, présentant une forme sensiblement polygonale de sorte à former des arêtes entre lesdites faces courbes (F1-F4). L'invention concerne encore un procédé pour la fabrication d'un tel applicateur (10).
