Abstract (en)  
There is provided a top comb device (10) of a comber, including a top comb holder (11) that is moveable in synchronization with a nipper frame (21), and a top comb (12) that is detachably fixed to the top comb holder. The top holder has a U-shaped fixing support member (16) that clamps the top comb by engagement with the top comb at opposite sides thereof across thickness thereof.
