Abstract (en)
[origin: EP2924163A1] Disclosed is a washer having a housing (1), a loading/unloading port (3a) that opens and closes when laundry is loaded or unloaded, a water storage section (4) disposed below the loading/unloading port (3a), a water supply device that supplies water to the water storage section (4), and a water drainage device (7, 7a) that drains water from the water storage section (4). The washer includes a movable shelf (2) for placing the laundry thereon, and a shelf drive mechanism that moves the movable shelf (2) in vertical direction. The shelf drive mechanism places the movable shelf in an upper position when the laundry (2d) is loaded or unloaded through the loading/unloading port (3a), and places the movable shelf (2) in a lower position when the laundry is washed in the water storage section (4).
