Abstract (en)
The present invention discloses a light fitting of the type comprising: # $\text{\textcircled{c}}$ a light generator (3); # $\text{\textcircled{c}}$ joining means for joining to a surface (1); and # $\text{\textcircled{c}}$ an anti-glare element (6); wherein the anti-glare element is an element which avoids users from being dazzled when they look towards the light generator element. Said anti-glare element is disposed enveloping, at least partially, said light generator (3) and, to resolve the problem of the devices of the prior art of being difficult to handle for their installation or maintenance it is, substantially, of an elastic material so that it can be deformed to perform its installation and, later, returns to its natural form once installed.
