Abstract (en)  
Luminaire with inclination mechanism of the type that comprise at least one frame (1) with at least one opening (2) for the exit of the light and a lamp (3) which is the light source. The inclination mechanism comprises a rotary worm (4) mounted on the frame (1), a truncated pinion (5) which tilts with the rotary movement of the worm (4), and a mobile support (6) wherein the lamp (3) is housed and which is joined to the truncated pinion (5) so that it moves together with said truncated pinion (5) with respect to the frame (1) to incline the mobile support (6) with the lamp (3) with respect to the frame (1).
