Abstract (en)

[origin: WO2014082911A1] The invention relates to a cartridge (100), comprising a drum (10), which has at least one chamber (20) and electrical contact elements (30, 40), an adjusting device (200), which is designed to rotate the drum (10) about the center axis (15) of the drum, and electrical conducting tracks (50, 60) on a housing (110) of the cartridge (100), wherein the electrical contact elements (30, 40) are brought into sliding contact with the electrical conducting tracks (50, 60) in order to transmit electrical energy.
