Abstract (en)

[origin: WO2014082745A1] The present invention relates to a profile element for connecting an attachment part (21) on a vehicle window (22), with an extruded profile body (1) made of at least one plastic material, comprising a fixing section (2) for fixing the profile body (1) on the vehicle window (22), a receiving section (3) bordering the fixing section (2), wherein the receiving section (3) has a latching recess (4) for receiving in a force-locking and/or form-locking manner a connection element (20) of the attachment part (21), at least one strengthening insert (5), and at least one latching element (6) protruding into the latching recess (4), wherein the latching element (6) is designed and arranged such that it forms a barbed hook for the connection element (20), wherein the latching element (6) is formed by a part-section (6') of the strengthening insert (5).
