Abstract (en)
[origin: WO2014082983A1] The invention relates to a valve for regulating two gas flows, comprising a housing (1), two channels (2, 3) arranged in the housing for conducting a respective gas, a first flap (7) arranged in the first channel (2) for opening and closing the first channel (2), said first flap (7) being rotatably arranged on a shaft (8), an electric motor for actuating the shaft (8), a second flap (9) for opening and closing the second channel (3), and a third channel (4) into which the first and the second channel (2, 3) lead. A connecting element (10) is arranged on the first flap (7), and the first flap is connected to the second flap (9).
