Abstract (en)  
An object is to provide a head guard attachment structure for a forklift that absorbs deformation caused by welding joint, so that quality is stably secured and assembly to a vehicle body is facilitated. A head guard attachment structure includes a head guard 5 including a pair of right and left front pillars 51 disposed at a front of a vehicle body 2 of a forklift 1 and arranged at an interval in a vehicle width direction, a pair of right and left rear pillars 52 disposed at a rear of the vehicle body 2 and arranged at an interval in the vehicle width direction, and a ceiling 53 disposed over the front pillars and the rear pillars. A fastening direction of fastening bolts 22a which fasten either one of the pair of front pillars 51 or the pair of rear pillars 52 to the vehicle body 2 is the vehicle width direction, and a fastening direction of fastening bolts 22a which fasten the other is the vehicle front-rear direction.
