Abstract (en)

[origin: WO2014085841A1] Method for producing a cross-country ski (1), wherein a plurality of layers, in particular a ski core (5), reinforcing layers (4), a cover layer (7) and/or a running-surface coating (3), are adhesively bonded to form a composite body, wherein, in a first step, the ski core (5) and the reinforcing layers (4) are adhesively bonded in the hot state to form a ski body (11), wherein the ski body (11), as reinforcing layers (4), has an upper flange (12) and a lower flange (13), wherein, in a second step, the ski body (11) and at least one further layer (14), in particular the running-surface coating (3), are adhesively bonded to one another in the cold state, and ski (1) which can be produced using said method.
