Abstract (en)

[origin: WO2014086504A1] The invention relates to a process for producing liquid, low-in-water to water-free detergents or cleaning agents, in particular a machine dishwashing detergent, which contain at least one sulfopolymer and at least one builder component, wherein, during the production, the at least one sulfopolymer is used in the form of an aqueous solution and the at least one builder component is used in solid form. The invention further relates to detergents and cleaning agents produced using said process and the use thereof.
